

# GENIE DATA BACKUP

Genie is the only backup system we use and trust.  
Download a free trial [here](#) phone us if you need more info.

USB Memory Sticks are way too slow, and N-Book Drives not reliable enough.

Backup in Raw format, once you need the data, everybody must be able to read your data.

Disconnect your backup hard drive because Ransomware can also encrypt all your backup data.

Some Backup software use their own format and you can't retrieve the data without their software.

Backup to several USB3 Hard Drives, hide one in the ceiling with a NAS connection to your computer.

Test your backup by making spot checks in your most recent Word, Excel, Outlook and others data files.

## 1) Job Info

Backup Job Name = A

Backup = Do not alter this square block

Create quick backup shortcut on desktop = Your Choice.
